## Hospital's themed floors for easy wayfinding

Evoking the imagery of the Northern California ecosystem, each floor at Lucile Packard Children's Hospital Stanford has a different theme and animal ambassadors that give you the feeling that you're part of nature as you move through the hospital.

A coordinated array of animals and colors helps identify the hospital's department names and room numbers.

Our large iconic sculptures at the connections—the train, the Mama Bear and her baby, the toy cow and dinosaur, will help guide you.

It's a delightful way to enjoy the journey.
